## Summary

I Love coding,

Hi there! I'm Muhammad Aamir Azhar, I am a front-end developer fully trained in modern designing tools and frameworks, with a strong background in TypeScript, React.js, HTML, and Tailwind CSS. Front-end web development calls to my passions, It incorporates creativity and problem-solving and I'm allowed to break it to improve the code.

I love applying responsive design principles and watching my web pages shrink into mobile screens and still look amazing. It's oddly satisfying. I think in a way I am kind of like those web pages; I am moldable, but I still keep my creative flare intact.

Please feel free to contact me via LinkedIn, Email: aamirlucky60@gmail.com, and WhatsApp: +92 302 6737494.

## Experience

### Frontend Web Developer

PIAIC

Mar 2023 - Present (7 months)

## Education

### Preston University
